ThermaTech Superheated Water Equipment

This is to confirm, that Barry McCann, Derran Slous, Steve Garaty and David Norman are 'Approved ThermaTech Operators', having received the full appropriate training and induction into the safe and correct use and adjustment of ThermaTech 'Superheated Water' system, as supplied by us at Restorative Techniques Limited.

The system is primarily used for the purposes of cleaning masonry surfaces and general building / memorial conservation work. Including removal of previously applied surface coatings, organic matter, traffic film, environmental pollution residues and graffiti.

We can also confirm that these particular operators received their latest training on 04/06/2015 into the use of this specialist hot and superheated water equipment. We therefore regard them as experienced operators of this specialist equipment.

Our unique supplier reference with Royal Institute of British Architects is, RIBA rps. 27199.

Barry McCann, Derran Slous, Steve Garaty and David Norman

Signed by Mr Jamie Fairchild
Managing Director
